

# Liverpool Thoracic Radiology Course 2024

## Testimonials from previous attendees:

*"A huge variety of cases that were carefully selected for the course. Very impressive!"*

*"Interesting cases, brilliant teaching with excellent explanations"*

*"Helpful to scroll through images live"*

*"I have already recommended to others! Brilliant course! Thank you!"*

*"Broken down into 4 sections which is less overwhelming compared to a full-day course"*

*"The format of the sessions, lots of examples and access to the images made for very thorough learning and high amount of take-aways. Going through extensive examples and having it explained in such clarity was extremely helpful."*

Welcome to all physicians & allied healthcare professionals.

Whether you are revising for the SCE or looking to enhance your skills in interpreting thoracic radiology.

Join us in our online course designed to equip you with the knowledge and expertise in the fundamentals of reviewing chest imaging.

100+ Case based discussions with access to pre course cases, images and recordings. Topics include pleural disease, mediastinal masses, lung cancer staging, ILD and many many more.

Upon successful completion of the course you will receive a Certificate of attendance.
